

your feedback move the world

Easy Feedback Token "EFT" was created to reward people who communicate useful and private feedback from www.EasyFeedback.com to improve products, services and processes of companies and institutions. "EFT" can be exchanged for products, services, cryptocurrencies or money at a market price.

The "EFT" token will be sold through an IEO (Initial Exchange Offering).

How do we earn money?

Why buy Easy Feedback Token "EFT"?

A business that already exists

Easy Feedback has been involved in the feedback market since 2015, as a trusted third party, with an online platform that connects customers and companies since mid-2015.

Tested technology

Easy Feedback already uses a secure, proven and easily scalable technology to internationalize and commercialize the project, with 730,000 dollars already invested.

Subscription to Easy Feedback PRO

Companies are already buying the Easy Feedback PRO subscription.

More than 200,000 Feedbacks

More than 200,000 feedbacks sent to more than 9,000 companies in 50 different countries. 200 to 300 feedback are sent daily.

Legal advice service

The legal advisory service has been launched in March 2019.

Solid Business Model

Easy Feedback has a solid business model, regardless of how IEO is going.

Bonus between 10% and 40%

People who acquire ETFs in the IEO will obtain a bonus between 10% and 40% on the price of the token, depending on the phase at which they buy.

Exchange

They buy a digital asset that will be quoted at least in the cryptocurrency markets: P2PB2B and Tokpie.

Liquidity

Easy Feedback will buy 20% of its profits annually, generating liquidity.

Stability

50% of the EFTs acquired by Easy Feedback are distributed among people who have EFTs to the official web wallet and have the KYC approved. The other 50% are returned to the total supply.

Blockchain and EFTs

By incorporating the blockchain, we add to the existing process the possibility of rewarding the feedback with a digital asset and the opportunity to involve our users in the benefits of the business.

Online store

The EFTs can be used to buy exclusive and original products in our online store. And if they do not find anything of interest, they can exchange their tokens for gift checks.

Feedback will grow

By rewarding the feedback, we will have more users on the platform. The EFTs will serve to accelerate and increase the utility and benefits of our business and make it reach the entire world.

The global "Hub" of Feedback

We want to be the link between private feedback sent from customers to companies and institutions globally.
